

Development process

All 3 images from this project were made in procreate, the process off my making these images started with the background of negative words. Using the type feature and changing the opacity of each individual word allowed me to creat depth in the image. Then adding the slogan in a vibrant red created a disconnect from the dull background. Next I added the silhouettes of the various musicians and sizing them to the frame. Finally using the type tool and the distortion feature I moulded the words of positive to the shape of the musical instruments or musician.
